

Public infrastructure provides the foundation on which our community is built. Street overlays, sidewalk installations, ditch-cleaning, water-production and purchases, and new project completions are some of the main functions provided by the city to ensure effective growth, support and maintenance of public infrastructure. These items are somewhat the unsung heroes of a community. When they are working great, they are seldom noticed. A growing city like Pearland is still strengthening its “bones” of roads and utilities, and must balance the immediate maintenance needs with the importance of looking ahead.

The City uses a combination of hired professional staff and executives, contractors, professional service-providers and technical resources to manage and complete the activities that give our residents the ability to move about the City effectively, receive clean and safe drinking water, properly discard of waste, and prevent flooding in our streets, neighborhoods and retail nodes during heavy rains and storms.
